Climbing Rose

...HELENE

A Grand New Hardy Climbing Rose, introduced from Germany, and undoubtedly, the Greatest Novelty in Climbing Roses offered for years.

HELENE is a

strong rapid grower, throwing up canes, 10 to 12 feet high, and making a well-formed bush in a single season. In growth and habit it is similar to Crimson Rambler, but the foliage is better and it is almost thornless. It is entirely hardy and needs no protection, unless very far north. The flowers are larger and more double than Crimson Rambler, and borne in magnificent clusters, entirely covering the bushes from top to bottom, for weeks at a time. The color is soft violet crimson, much darker, and entirely different shade from the Crimson Rambler, and, if possible, more beautiful.

Helene should be in every collection, and is splendid for porches, trellises, screens, etc., in fact, wherever the finest Hardy Climbing Roses are wanted. Last year it was sold at \$1.00 each. Our price is 25 cts. each, 5 for \$1.00, postpaid. Two-year size, 50c. each, Three-year size, \$1.00 each, by express.

Carmine Pillar, or Thousand-Flowered ...Rose...

A magnificent climber, bears splendid wreaths and clusters of immense single roses, each one 12 to 15 inches around, deep rich carmine red, and looking almost exactly like beautiful red clematis flowers, hanging in graceful clusters all over the vines, makes a grand show trained up to a pillar or trellis, where it can grow tall and have good support. **Perfectly hardy and needs no protection.** Will grow anywhere and bloom profusely every year. 15c. each, 2 for 25c.; \$1.50 per doz., postpaid. Two-year size, 30c.; \$3.00 per doz., express.

BELLE VICHYSEOISE—A new constant blooming Cluster Rose, flowering continuously through the whole season; pure white flowers in grape form clusters, sometimes tinted rose; semi-climbing habit, best for low trellises and beds, from which roses can be picked from June to December. THE CONARD & JONES CO'S. NEW ROSES

—of 1900—

NEW HYBRID TEA ROSE, MAGNAFRANO (C. & J. Co., 1900) This grand Rose was obtained by carefully hybridizing the splendid Hybrid Perpetual Rose, *Magna Charta* with *Safrano Tea*. It combines the hardiness and vigor of the former with the free-blooming habit and delightful fragrance of the Tea Roses. The flowers closely resemble *Magna Charta* in size and fullness, but are more double, and the color is clear deep rose, very beautiful and delightfully sweet. It is a strong healthy grower, and constant and abundant bloomer. Confidently recommended as one of the finest **Hardy Ever-blooming Roses for Garden Planting**, and also for Cut Flowers. Strong Mailing Plants, 50 cts. each, postpaid. Two-year size, \$1.00 each, express.

NEW MEMORIAL ROSE, ALBA RUBIFOLIA (Hybrid of *Wichuraiana*, C. & J. Co., 1900) —This is a cross between *Wichuraiana* and *Coquette de Lyon*, and, as the flowers are pure white, and much of the foliage and young growth bright red, it is appropriately named, *Alba Rubifolia*. When trained up to a post or pillar it soon makes a beautiful weeping bush, or it may be left to form a deep mat of leaves and flowers on the ground. It is evergreen and retains its foliage all winter which adds greatly to its beauty. Its round thick leaves are so bright and glossy, they shine as if varnished. The flowers are large and fragrant, perfectly full and double to the centre, and borne in great profusion for weeks at a time. It is entirely hardy, needs no protection, always looks bright and cheerful, and is undoubtedly the finest memorial rose, for Cemetery Planting, yet introduced. Good Mailing Plants, 35 cts. each; \$3.50 per dozen, postpaid. Two-year size, 60 cts. each, \$6.00 per dozen, express.

THE TWO FOR 75 CTS., POSTPAID.

Sometimes the flowers are distinctly striped and variegated, but frequently are of entirely different colors, some being clear satiny-pink, some bright red, and others deep yellow, with all intermediate shades between, which, besides being very beautiful, are a great curiosity. The colors and variegations become more distinct and remarkable as the plant becomes older and stronger. It is a free and constant bloomer. ...A REMARKABLE OFFER...

WE recommend our Quick-Blooming Roses for people who wish a heavier grade of plants than our first size, but do not care for two-year bushes. They are selected early flowering varieties which have been re-potted and specially prepared for **quick bloom**, and being older and stronger than the first size, will grow up strong and vigorous, and bloom very quickly without petting or nursing. They cost a little more, but are well worth the difference and will give immense satisfaction.

HARDY HYBRID PERPETUAL ROSES.

THE Hybrid Perpetuals are considered the most valuable of all Roses, because they bear the largest, sweetest and most brilliant colored flowers, and are so hardy and vigorous they live over winter without protection and continue to bloom regularly from year to year. Their grand flowers are of all shades of red, crimson, scarlet, pink and white, but no yellows. They thrive and bloom finely in all sections of the country and should generally be planted in open ground, as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time, and occasionally during the Summer and Fall months. Though called "Perpetual," they are not constant bloomers, but are the finest and most beautiful of all Hardy Roses. We offer the Choicest and Most Beautiful Varieties in Cultivation, and send Strong Healthy Plants from 2½ and 3-inch Pots all on their own Roots. Persons who order at the single rate may select to value of 20 cts. additional on every dollar sent.

TWO-YEAR OLD ROSES

The demand for our Two-year Old Roses is constantly increasing, and we are fully prepared this Season with an extra fine stock of choicest varieties, which will be found fully described on pages 36 and 37.

These Two-year Old Roses are so large that they cannot be sent by mail, but must go by express, and the purchaser pays the express charges; but we are careful to pack as light as the safety of the plants will permit, and always add as many extras as we can afford, to help pay the charges. All our express shipments are billed through at the special 20 per cent. reduction allowed on plants, so that the charges are now very reasonable.

Two-year Roses weigh when packed about as follows: 12 plants, 20 pounds; 25 plants, 35 pounds; 50 plants, 50 pounds; 100 plants, 75 pounds. This includes the earth left on roots, which is quite necessary to Roses of this size; if all the earth is shaken off the plants may be hard to start and slow to bloom, and this is one of the reasons why Two-year Roses should always be sent by express when convenient.

PLEASE NOTICE: All our Two-year Roses are grown in pots, on their own roots, and are fine thrifty plants, 12 to 15 inches high, ready for immediate bloom.

New Crimson Chenille Plant

Acalypha Sanderi, or Comet Plant.

Acalypha Sanderi, or Comet Plant

WE published an elegant colored plate of this wonderful new flowering plant in our last Fall Catalogue, which attracted a great deal of attention and made large sales. This cut is an equally good representation of the plant as it really appears (except in colors), and is not at all over drawn. It grows 12 to 18 inches high, blooms quickly and abundantly, and the flower tassels grow as long as the plant is high. They are covered all over with fine crimson flowers, looking almost exactly as if made of crimson chenille or silken plush. The plant likes heat and moisture, and good rich soil, but grows easily and blooms so quickly, that many are beginning to flower when sent out. When warm weather comes set out in the flower bed and it will bloom the whole season, and if taken in before cold weather, will be larger and finer for the house than before. It is a most surprising novelty and a great curiosity wherever seen.

Nice mailing plants, 20, 25 and 35 cts. each, according to size, postpaid; extra size blooming plants, from FIVE AND SIX INCH POTS, 50 cts., 75 cts. and \$1.00 each, by express.

New Passion Flower, Southern Beauty (AMERICA)

UNLIKE most other Passion Vines, this splendid new variety, besides being exquisitely beautiful, is a strong, vigorous grower and entirely hardy; will climb up a trellis 10 to 20 feet high in a season, and cover it all over with splendid wreaths and clusters of large handsome flowers and foliage. The flowers are four to five inches across, and the color is an elegant combination of red, white and blue shades, so entirely unique and striking, that they attract attention at once. The form of the flowers, though much reduced in size is well shown in the engraving, and as the foliage is handsome also, it can be recommended as one of the choicest and most beautiful hardy flowering vines now offered. In very exposed situations, the roots should have a covering of leaves or garden litter before severe freezing; they can then remain in the ground over winter and will bloom every season, for years. Good strong roots, 20 cts. each; 3 for 50 cts.; \$1.50 per doz., postpaid.

NEW HARDY PERPETUAL-
BLOOMING ROSE

ALICE ALDRICH Hybrid, ROSA RUGOSA and
CAROLINE DE SANSEL.

THIS is a grand, new garden rose of unusual value; it is a true perpetual bloomer, producing lovely roses all through the season; the flowers are clear, bright pink, very large, perfectly double and exceedingly sweet; the bush is a strong, upright grower, and entirely hardy. It is a new variety and not much known as yet, but promises to be one of the finest bush roses for planting in garden and lawn, and should have a liberal trial. 15 cts. each, larger 20 cts., postpaid. Two-year size, 35 cts. each, by express.

THE NEW GIANT- FLOWERING

....BROWALLIA

◉ VIOLET BLUE

THIS is a most charming plant both for the window garden and the flower bed; makes nice bushy little plants, 8 to 10 inches high, and blooms all the time. The flowers are large, fully 2 inches across and lovely deep violet-blue. This is a very favorite color, and it would be hard to find a plant that is easier grown or a more constant and satisfactory bloomer.

When Winter is over set out in the flower bed, and it will bloom profusely the whole season. We recommend it as sure to please, both for Summer and Winter bloom. Very sweet and handsome. **15 cts. each; 2 for 25 cts.; \$1.50 per dozen.**

Hardy Perpetual-BloomingPINK EMPEROR

(Dianthus Querterri)

This is a grand plant for beds and borders; very scarce and not much known; large, perfectly double flowers, of true carnation form, elegantly fringed and richly clove-scented; well borne up in tall, stiff stems; color, deep rich crimson; extra fine for cutting and wearing, blooms the whole season; perfectly hardy and needs no protection; very beautiful and desirable. **The only True Hardy Perpetual-Blooming Pink we know of. Strong Plants, 15 cts. each; 2 for 25 cts.; 1.50 per dozen, postpaid.**

THE NEW MAYFLOWER VERBENA

New Giant-Flowering Browallia.

THIS Grand New Verbena was raised and named by a noted California specialist and is undoubtedly one of the choicest floral novelties recently introduced. The shape of the individual flowers and clusters of bloom, as well as the color, are identical with the flowers of the Trailing Arbutus, or Mayflower, so universally admired. It also has the same delicious fragrance. The flowers are about the size of a twenty-five cent piece, and in delicate coloring and rich perfume it is almost unequalled. The color is rich, creamy white, with delicate pink markings; it is of trailing habit, and will quickly cover the ground with green leaves and exquisite clusters of lovely fragrant flowers. **Fine Strong Plants, 15 cts. each; 2 for 25 cts.; \$1.50 per dozen, postpaid.**

New Flowering BEGONIA Gloire de Lorraine

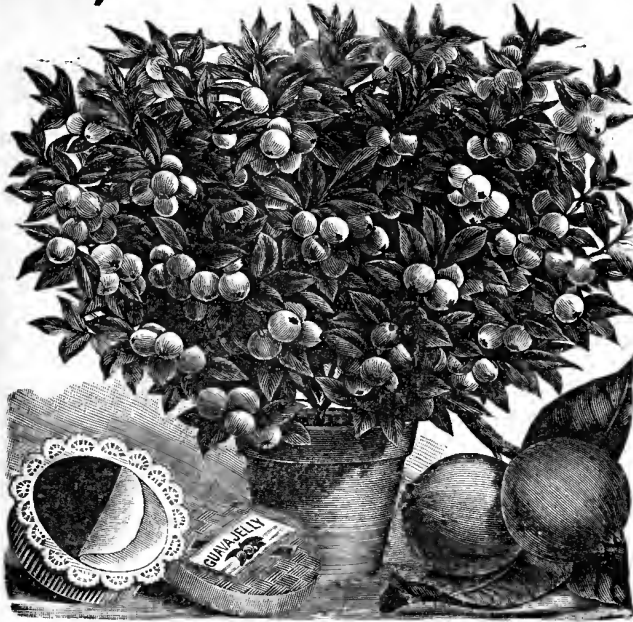

Gloire de Lorraine is undoubtedly one of the grandest and most beautiful Flowering Begonias ever introduced. It is a perfectly enormous bloomer—the whole plant, stems and all being crowded full of flowers for months at a time; color, clear rose-pink and very beautiful. As it is difficult to propagate and plants are scarce, the price is high, but it is worth all it costs. **35 cts. each; \$3.50 per dozen, postpaid.**

The
Catley or

STRAWBERRY GUAVA

A Luscious Tropical Fruit and Charming House Plant

The Strawberry Guava.

THIS is a native of Cuba and other West India islands where its fruit is of great value for food, and also for making confections, which are exported to all parts of the world. Here, in our climate, it makes a charming house plant, rivaling the famous Otahiete Orange in beauty. It is a nice, clean grower, with thick, glossy green leaves, and, like the orange, it bears both flowers and fruit at the same time. The flowers are pure white and delightfully fragrant. The fruit is large, nearly the size of a walnut, and of a beautiful reddish color; the flavor is delicious, sweet and spicy, and yet rich and delicate. It is very rare and interesting. The plant begins to bloom and bear fruit while quite small. The plants are easily grown and will thrive with the same treatment given the Otahiete Orange, for which it is a nice companion, and a charming and interesting plant. **Nice mail plants, 20 cts. each, 6 for \$1.00.**

THE YELLOW OR ORANGE GUAVA—Similar to the above, except in color which is rich orange yellow. Very handsome and desirable, but we have it in two-year size only. Suitable for tubs, lawn boxes, etc. **Price 40 cts. each, by express.**

The Beautiful Dwarf Otahiete Orange.

This beautiful dwarf Orange tree is one of our very prettiest house plants; thick glossy green leaves and deliciously sweet, pure white flowers; begins fruiting at once, and bears flowers and lovely golden yellow oranges all the year round; easily grown and requires very little care; nice plants. 15 cts. each; larger plants, 20 and 25 cts., according to size.

FLORIDA LIME—A beautiful house plant; hardy and easily grown; very similar in appearance to the orange; thick, glossy green leaves, small waxy white flowers, borne in clusters and deliciously sweet, small, round yellow fruit; very fragrant. A nice companion for the orange. 15 cts. each, the two for 25 cts.

OLEA FRAGRANS (Sweet Olive)—A rare and very choice house plant, somewhat resembling an orange in habit of growth, and becoming more beautiful year by year. Has thick, glossy green leaves, and small, pure white flowers, which are borne in profusion for at least six months in the year. It is highly valued for its exquisite fragrance, which will fill the whole house with delicious perfume, for months at a time. Will thrive best in a moderately cool room. **Strong blooming plants. 35 cts. each, postpaid.**

The Beautiful Wax Plant, Hoya Carnosa

This is not new, but a very beautiful and satisfactory house plant. It is a low climber with brown stems and thick glossy olive green leaves; bears beautiful clusters of exquisite wax-like flowers, creamy white delicately tinted with pink; they are delightfully fragrant and continue beautiful for months at a time. It forms dense clumps of light feathery foliage, crowded full of flower stalks all the time. The blossoms are very dainty and graceful, nearly half an inch across and borne in rings on slender stems, 12 to 15 inches high; color, delicate rosy flesh, with pale golden centre. THE NEW PARADISE FLOWER

(*SOLANUM WENDLANDII*.)

SINCE introducing this splendid plant, we have watched its habit with great interest. At first, we thought it best to treat it as a climbing vine, for porch or trellis, but we have found that it blooms quicker and better when set in an ordinary bed and given no support at all; in this way it begins to bloom very quickly and will soon be covered all over with immense clusters of large, sky-blue blossoms presenting a most striking and beautiful effect and continuing to increase in beauty till killed down by

frost; the flowers are over two inches across, and the clusters contain from 30 to 50 flowers and buds at a time. 3 or 4 plants set in a 4-foot bed will be a mass of lovely bloom for months. Strong Plants, 15 cts. each; 3 for 40 cts., \$1.50 per doz., postpaid. Larger size 25 cts., 3 for 65 cts., postpaid: \$2.00 per doz.; by express.

If you do not hear from us within a reasonable time after sending your order, please write again, stating when and in what form payment was sent, and giving full information and list of what you ordered, so that it may have immediate attention.

C. & J. Velvet Green Lawn Grass Seed.

THE BEST BRAND FOR SEEDING DOWN NEW LAWNS AND RENOVATING OLD ONES.

OUR VELVET GREEN LAWN GRASS SEED is not excelled by any for producing a smooth, even, velvety-green sward that will withstand drought and hard usage, and always makes a handsome appearance. In seeding down a lawn or grass plot, three things are necessary to insure success: First, to prepare the ground so as to have a fine, smooth seedbed; second, to put on plenty of seed, never less, but rather more than the directions call for; third, to start the lawn-mower as soon as the weeds (which are always in the ground and sure to start first) are tall enough to catch, and keep them mowed off close till the grass has time to start and become well-established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top-dressing when needed. One quart of seed is enough for three-hundred square feet (fifteen by twenty feet) or at the rate of five bushels to the acre. Lawns should be kept neatly mowed, which induces a clean even growth of fresh lively green.

Price by mail, postpaid, 25 cts. per quart; two quarts for 45 cts. in bulk, purchaser paying express charges, \$1.00 per bushel; \$4.00 per bushel of 50 lbs.

It is a most gorgeous and impressive sight—above the luxuriant tropical foliage there rises a beautiful mass of oriental flowers, whose immense size and intensely brilliant colors combine to make it the most handsome, most ornamental and, at the same time, most satisfactory bed one can plant. We recommend the following combinations for planting in beds. May be had either in dormant roots or potted plants. The latter, as a rule, make quicker and more uniform growth, but must be sent by express at purchaser's expense. We expect to have potted plants ready for shipment soon after April 10th.

DIRECTIONS FOR PLANTING CIRCULAR BEDS—Plant one Canna in centre of bed and the next six Cannas 18 inches apart in a circular row around the centre; each Canna in first circle should be 18 inches away from the centre. Hints on Growing Flowers from Seeds. Always buy **C. & J. Surpassing Flower Seeds**; they are the best. A dollar's worth of **C. & J. Surpassing Flower Seeds** will produce many times as many flowers as the same amount expended in plants.

Any ordinary soil will grow beautiful flowers. Make it fine and mellow, plant at proper time, keep clear of weeds, and Nature "will do the rest."

Do not plant when ground is wet and soggy, or it may bake so hard as to prevent the little plants from coming through.

Do not cover too deeply, very fine seeds should be merely pressed in with the hand; see printed directions sent with every order.

Do not allow plants to stand too thickly; weed out or transplant if necessary; if crowded they cannot bloom satisfactorily. A home adorned with beautiful flowers is sure to be happy and prosperous.

Transplanting. Nearly all flowers are improved by transplanting, except Sweet Peas and Poppies which are usually sown where they are to grow. By starting them in Boxes, Hot Beds or Cold Frames, and transplanting, you escape danger of frost and secure the largest and finest flowers.

The Crimson Queen Canna had four beautiful large bunches of splendid, orchid-like flowers. Also the seeds were a garden by themselves, but I did just as you said—planted everything in the house first, so if any one complains it is not your fault, but their neglect or careless attention

Choice New Garden Fruits

EVERY person who has a garden needs some of our **Choice New Garden Fruits**, they take very little room; come into bearing quickly, and will repay their trifling cost many times over, in delicious fruit, beside the pleasure and satisfaction of having them of your own. The varieties offered below are the very finest sorts, and it will pay you to give them a liberal trial this year.

The New Dwarf Bismarck Apple

A Half Dozen Bismarck Apple Trees, in Bearing.—Price, \$1.25, postpaid.

WE take pleasure in recommending this wonderful **New Dwarf Apple** for planting in gardens and yards, where fine fruits are desired, but not room for large trees. It is said to have come from New Zealand, but has now been fully tested in this country, and proved to be a most valuable variety; very remarkable for its dwarf growth, and surpassing all others in early bearing. Little trees not over a foot or two high, will frequently bear large apples a few months after planting, and it seems certain they can be expected to bear abundantly in a very short time. They are so dwarf they can easily be grown in pots or boxes, if desired, but are especially recommended for small gardens and yards where there is not room for large trees. You can grow them in any vacant corner, and have some delicious fruits of your own. The apples are of large size, beautiful, rich golden yellow, streaked with red; they ripen early and are of most delicious quality. We can recommend the Bismarck Apple as a most valuable variety for situations noted above. May be planted only three or four feet apart along fences or buildings, and should soon bear abundantly.

PRICE, nice One-year Trees, 25 cts. each, 6 for \$1.25, \$2.50 per doz. postpaid.

Larger size, 35 cts. each, \$3.50 per doz., by express at purchaser's expense.

New Perpetual, or Ever-Bearing Strawberry,

ST. JOSEPH

Very Productive

NEW PERPETUAL, OR EVER-BEARING STRAWBERRY, ST. JOSEPH.

The St. Joseph is highly recommended as the only true Perpetual large-fruited Strawberry yet introduced, entirely distinct and immensely superior to all other varieties of so-called Ever-bearing Strawberries previously sent out. The fruit is of good size, dark red color, and excellent flavor. The plant keeps throwing up flower stalks from May until Autumn, and will mature berries in all except the very hottest months, or if the blossoms are kept picked off after the Spring crop is gathered, they will mature a very heavy Fall crop. The plants are vigorous and hardy. They make runners freely, and are very productive, both in Spring and Fall. It is one of the most interesting new fruits we know of, and is being extensively planted. Price, 10 cts. each; 6 for 40 cts.; 12 for 75 cts.; 25 for \$1.25; 50 for \$2.00; 100 for \$3.50, postpaid; \$3.25 by express.

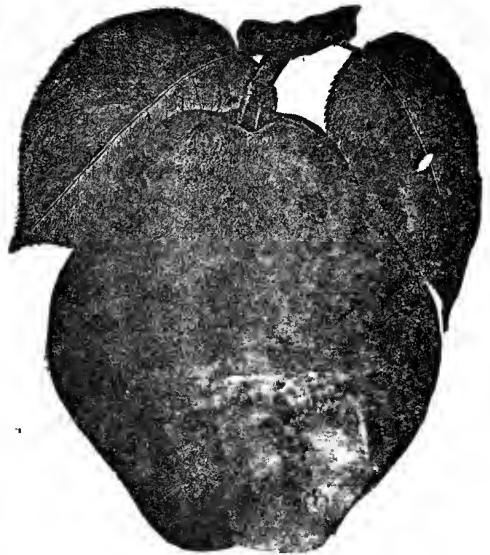

STRAWBERRY RASPBERRY.

...The...
**Strawberry
 Raspberry**
 or
**Japanese Tree
 Strawberry.**

A new and exceedingly beautiful fruit, the size of large strawberries, bright shining crimson, fine rich flavor, excellent for cooking and preserves. Grows two to three feet high; dies down in winter, but comes up fresh every spring, and bears the same season and every year. Begins to ripen in July, and continues loaded with fruit for three to four months. Does well everywhere, in poor ground or rich; immensely productive, and a sure bearer every year, regardless of heat or drought; very valuable for localities where more tender varieties do not succeed. Tested for three years, and highly recommended. Good Plants, 10 cts. each; 3 for 25 cts.; 80 cts. per doz., postpaid. \$5.00 per 100, express.

The KEIFFER PEAR

WE are sure that our friends will like to get this Wonderful New Pear, when they can have nice thrifty young trees at so low a price. Our illustration is only about one-half natural size; the fruit is very large and handsome, rich yellow with red cheek, and is the **earliest bearing and most productive pear ever seen**; ripens in Autumn, and excellent for family use and market. The trees grow so erect they require very little room, and may be planted quite close together, along a fence or wall, and are sure to bear enormous crops very quickly. **Price, nice thrifty young trees, 20 cts. each; 6 for \$1.00, postpaid. Larger size, 25 cts. each; \$2.50 per dozen, by express.**

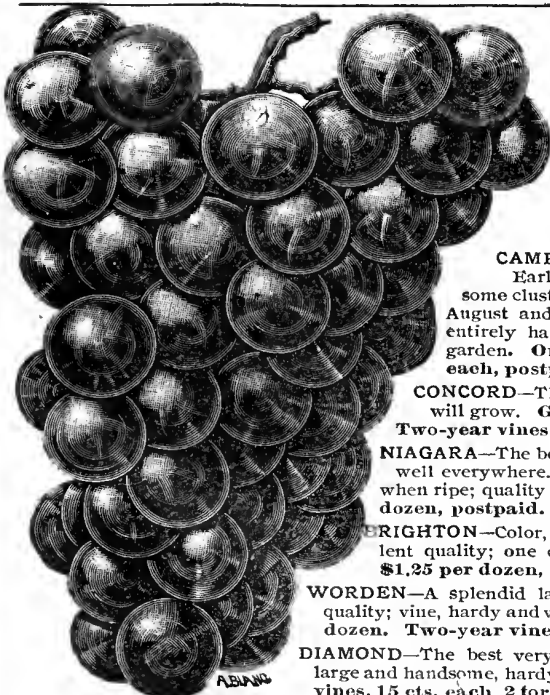

The Keiffer Pear.

New Ever-bearing Peach

A most remarkable novelty, begins to ripen in July and continues to mature successive crops for three or four months; the fruit is creamy-white, mottled and striped with reddish-purple; very juicy, and of delicious quality. The tree is a good bearer and has never missed a crop since its introduction. It is a truly remarkable novelty, highly recommended for family gardens. Bears ripe fruit and flowers at the same time. **Nice young trees, 15 cts. each, \$1.50 per dozen postpaid. Larger size, 25 cts. each; \$2.50 per dozen, by express.**

...New Japan Dwarf Peach...

This is the earliest of all peaches. A real dwarf-growing variety from Japan; very productive, bears when only three or four feet high. A little tree, only one year planted, matured twenty-four large peaches. Color, crimson and yellow, heavily overlaid with bright, almost blood-red; the flesh is red, too, and of excellent quality; a choice variety for garden culture. **15 cts. each, \$1.50 per dozen, postpaid. Larger size, 25 cts.; \$2.50 per dozen, by express.**

Campbell's Early.

THE BEST GRAPES

Everyone who has a yard or garden has room for one to a dozen choice grape vines. They take very little room, may be trained along a wall or fence, and will quickly bear an abundance of delicious grapes. The following are some of the very best varieties. We send good strong, well-rooted vines, at lowest prices.

CAMPBELL'S EARLY—Undoubtedly one of the very best New Early Grapes yet produced. Large size, excellent quality, handsome clusters, rich, glossy black with purple bloom; ripens the middle of August and will keep for weeks. Very vigorous and productive and entirely hardy. NIAGARA—The best leading white grape, very valuable and handsome, succeeds well everywhere. Bunch and berries, large, greenish-white, changing to yellow, when ripe; quality excellent. **One-year vines, 15 cts., 2 for 25 cts.; \$1.25 per dozen, postpaid. THE SET OF SIX FINE ONE-YEAR VINES, 75 cts., TWO-YEAR VINES, \$1.35, POSTPAID.

THREE LUSCIOUS JAPAN PLUMS

TOO much cannot be said in favor of these delicious Japan Plums. They make nice little low headed trees, and will usually mature a crop the second year after planting. Scarcely any other fruit trees will bear so quickly and abundantly, and few fruits are more delicious in flavor and quality. They are especially desirable for planting in gardens and yards where there is not room for large trees; they are easy to grow, require no special treatment, and may be depended upon to bear regularly every year. We offer three of the very best varieties.

New Japan Plum, The Hale.

NEW JAPAN PLUM, THE HALE—Stands in the first rank of Japan Plums and is especially noted for large size, great productiveness and excellent quality; bright orange yellow, mottled all over with rich cherry red; has an exquisite bloom and is exceedingly beautiful and attractive. **Nice one-year trees, mailing size, 15 cts. each, \$1.50 per doz., postpaid. Two-year trees, 25 cts., \$2.50 per doz., by express.**

ABUNDANCE—(Botan). Beautiful lemon-yellow ground, nearly covered with bright cherry red, and showing a lovely bloom; very large size, tapering egg-shaped; flesh, orange-yellow, melting rich and highly perfumed; most abundant and regular bearer; highly recommended. **Nice one-year trees, mailing size 15 cts., \$1.50 per doz., postpaid. Two-year trees, 25 cts., \$2.50 per doz., by express.**

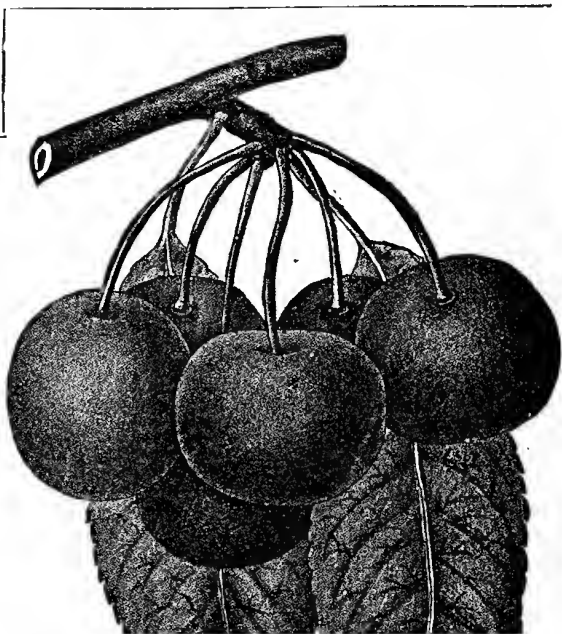

RED JUNE—Highly valued for early ripening and excellent quality; deep purplish red, covered with an exquisite bloom; very handsome and attractive and the best of the very early sorts. Flesh pale yellow; firm and luscious. **Nice one-year trees, mailing size, 15 cts., \$1.50 per doz., postpaid. Two-year trees, 25 cts., \$2.50 per doz., by express. The three varieties, one each, mail size, 40 cts., postpaid. The three in two-year size, 65 cts., by express.**

Two Choice New Cherries

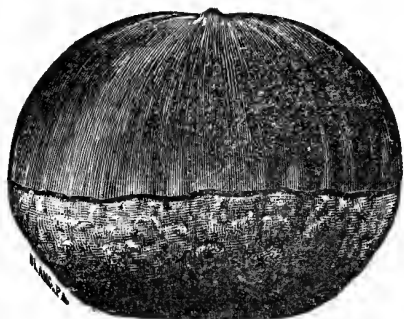

We cannot offer the Mercer Cherry this year as our whole stock of buds of this variety, was killed by the dry weather. We therefore offer the Montmorency and Napoleon—both very choice kinds, which we think will give satisfaction.

LARGE MONTMORENCY—A very large bright red, acid cherry, somewhat resembling Early Richmond, but larger and better, and if possible more productive; makes a neat compact tree; is a good early bearer, entirely hardy and free from disease. **Good one-year trees, 30 cts. each; \$3.00 per doz., postpaid. Two-year, 35 cts.; \$3.50 per doz., by express.**

NAPOLEON—This is an extra large cherry, with firm solid flesh; color deep yellow, clouded all over with dark purplish red; very beautiful, and of sweet, excellent flavor. The tree is a handsome erect grower, and an early and abundant bearer. Very desirable both for fruit and shade. **Good one-year trees, 30 cts. each, postpaid. Two-year, 35 cts.; \$3.50 per doz., by express.**

MONTMORENCY CHERRY.

Japan Giant Chestnut.

JAPAN GIANT CHESTNUT

Of the many good fruits introduced from Japan, none are more worthy than the Japan Giant Chestnut. The tree is quite ornamental, hardy and very productive, of dwarf compact habit, and begins to bear so young that the little trees are frequently loaded with fruit while in the nursery rows. The nuts are of enormous size, about four times as large as the common chestnut, and always sell at a high price. The Japan Giant Chestnut is a tree that every one should plant. It is the best chestnut yet introduced, and will give immense satisfaction, whether planted for profit or for home use. **25 cts. each; \$2.50 per doz., postpaid. Two-year, 35 cts.; \$3.50 per doz., by express.**

The Best New Currants

New Pomona Currant—Our illustration shows the berries only about one half natural size, but gives a good idea of its enormous productiveness.

It is highly recommended by all leading fruit growers who have tried it; has but few seeds and is the sweetest and best of all currants. When grown for market has averaged over 400 dollars per acre for several consecutive years. **Strong plants, 15 cts. each, 2 for 25 cts.; \$1.35 per doz., postpaid. \$6.00 per 100 by express.**

Fay's Prolific Currant—The largest and one of the best and most productive red currants ever grown, unexcelled for family use. **15 cts. each, 2 for 25 cts.; \$1.25 per doz.**

New Golden Mayberry

Grows in tree form, entirely different from other berries; claimed to bear large, luscious, golden-yellow fruit, ripening very early, before strawberries. **15 cts. each, 3 for 35 cts., \$1.10 per doz., postpaid.**

New Gooseberry, Utah Wonder

NEW TRIUMPH GOOSEBERRY.

UNDoubtedly one of the best American Gooseberries yet produced. It is a vigorous erect grower, entirely free from mildew, and less thorny than most other kinds. The fruit is extra large, color clear ruby red, and of rich subacid flavor, almost sweet when fully ripe. Very productive and a sure cropper. **Strong Plants, 20 cts. each, \$2.00 per dozen, postpaid. Two-year size, 25 cts. each; \$2.00 per dozen, by express.**

Two-year size, 20 cts. each; \$1.75 per dozen by express.**

NEW GOOSEBERRY CURRANT, (Crunells)

The bush looks like a Currant, but the fruit resembles a Gooseberry. An upright healthy grower, entirely without spines, and free from mildew and attacks of insects. It is very productive and the fruit is highly valued for all culinary purposes. Something entirely out of the usual, new and interesting. **15 cts. each, 2 for 25 cts.; \$1.25 per dozen, postpaid. Two-year size, 20 cts. each; \$2.00 per dozen, by express.**

NEW JAPANESE WINEBERRY

This remarkable berry belongs to the Raspberry family, and makes a strong, hardy bush, three to four feet high; the fruit is borne in large clusters, and covered with a curious burr of fine,

Champion Quince.

reddish moss, like a Moss Rose Bud, which opens when ripe, showing the berries, which are bright rich scarlet; excellent for cooking; makes fine jams, jellies and preserves; begins to ripen in July and continues bearing a long time; fruits the first season, is a heavy bearer. **10c. each, 3 for 25 cts.; 75 cts. per doz., postpaid.**

New Japanese Roseberry.

TWO BEST QUINCES

QUINCES are recommended among our finest fruits for cooking and preserving, and as the tree grows low and bushy, they require but little room, and may be planted along a fence or wall, or in any odd corner of the yard or garden. They are early and abundant bearers; the fruit is rich golden-yellow and very handsome, and makes the finest of preserves. We offer the **Two Best Varieties, Champion and Meech's Prolific. Nice 1-year, 20c.; \$2.00 doz., postpaid. 2-year, 30c.; \$3.00 doz., by express.**

The RATHBUN BLACK- BERRY.

KNOWING that our friends want the very best of everything, and are constantly on the lookout for choice New Garden Fruits of real value, we take great pleasure in recommending the—

NEW RATHBUN BLACKBERRY

which is such a vast improvement on all the older blackberries that it can almost be classed as a **new fruit**.

The berries are of enormous size; forty-five of them have measured a full quart; the flavor is delicious, very rich, sugary, and melting, without any hard core. The canes are of tree-habit, growing strong and erect; are entirely hardy, and marvelously productive; do not sucker, but root from the tips. The color is deep jet black, very handsome. They bear and ripen early, and of all the blackberries ever introduced, we can safely recommend this as the best, and especially for family use. It is undoubtedly one of the choicest and most valuable garden fruits you can plant. **15 cts. each, 2 for 25 cts.; \$1.00 per dozen.**

THE LUCRETIA DEWBERRY—This is well-known and highly valued for garden planting; it ripens a little before blackberries; the berries are often one and one-half inches long by an inch in diameter, sweet and luscious to the centre. It is very productive; a dozen plants will

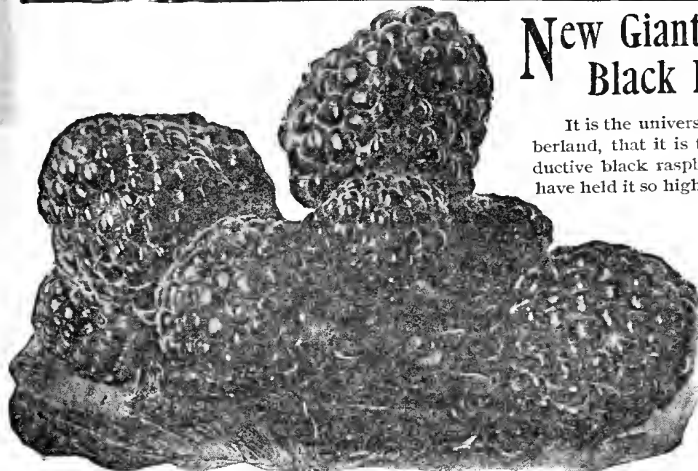

supply quite a large family, equally good raw or cooked. It is one of the very earliest and best of our garden fruits. **10 cts. each, 3 for 25 cts.; 75 cts. per dozen, postpaid.**

NEW WHITE BLACKBERRY, "ICE-BERG"—This is not offered as a curiosity, but as a veritable luscious, hardy and productive fruit, fully equal to the best blackberries in flavor and quality, with the additional advantage of variety in color. It seems to have been a chance seedling discovered in California, growing among others and attracting attention by its canes bending in all directions, with their load of delicious, snowy berries, which are not only white, but so transparent that the seeds may be seen in the berries when ripe. Berries are large, borne in fine clusters; the plants are vigorous and productive; and it makes a handsome addition to our list of garden fruits. **Good strong plants, 15 cts. each, 2 for 25 cts.; \$1.00 per dozen.**

New Giant Black Raspberry Cumberland

It is the universal verdict of all who have seen the Cumberland, that it is the largest, finest flavored and most productive black raspberry they ever heard of. The introducers have held it so high, people would not buy, but the price having now been reduced it will doubtless have a large sale, and it is safe to say, that everyone who buys the Cumberland will be more than pleased with its performance. It has been thoroughly tested by fruit growers for years, and is sold with full assurance, that it is the most profitable and desirable market variety yet known, because of its immense size, firmness and productiveness. Perfectly hardy, healthy, and vigorous; makes no suckers; roots from the tips. **Strong plants, 15 cts. each, 2 for 25 cts.; \$1.00 per doz., postpaid. \$6.00 per 100 by express.**

New Giant Black Raspberry, Cumberland.

WONDERFUL
NEW

LOGAN BERRY

(BLACKBERRY—RASPBERRY)

THIS grand, new berry has been grown here for several years. It makes a strong, vigorous growth and is quite hardy, unless in very exposed situations where slight protection may be advisable. It originated in California, and seems to be a true hybrid between the raspberry and blackberry, partaking of the nature of both in quality and appearance, but of finer and more delightful flavor. The berries are the size of the largest blackberries and rich, dark purple-red color. Very different and much larger than any other variety. It bears abundantly; the fruit has very few seeds, ripens early (before blackberries) and is of such excellent quality for eating and cooking, that it has brought four times the price of other berries and will probably continue high-priced for several years. It is well worthy of careful trial by everyone interested in new fruits, and is especially desirable as being new and entirely different from all other berry fruits. Strong plants, 15 cts. each, 2 for 25 cts., \$1.25 per doz., postpaid; \$6.00 per hundred, by express.
